1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 29 is rejected under 35 U.S.C. 102(b) as being anticipated by Shettigar.

Shettigar teaches a first closed reservoir 170, a second closed reservoir 214, first and second vent valves 212, 220, and primary channel 141 in communication with vacuum source 128. See Figure 12. Note that while the method of use of Shettigar differs from the intended use of the instant apparatus, the structural elements of the instant claim are taught. It is the examiner's position that the dimensions of the conduits are sufficiently large to support "not low" Reynolds number flow.
